The Government permitted the sale of up to 500 thousand tons of grain from the state reserve.

Decree of August 1, 2024 No. 2042-r

The Government approved the sale in 2024 from the federal intervention fund up to 500 thousand tons of wheat. The order was signed. The decision will contribute to maintaining a stable situation on the domestic food market.

Wheat, purchased during procurement interventions in 2014-2016 and 2022-2024, will be implemented on the exchange trading on the domestic market at prices not lower than the minimum selling price and not lower than the purchase price.

The federal intervention fund of agricultural products is formed due to procurement interventions. The state purchases products into the intervention fund when prices for it fall. This removes excess from the market, and agricultural producers receive the necessary support.

The decision on the sale of grain from the intervention fund (commodity interventions) is made upon a rise in prices. Saturating the market allows maintaining its stability.
